List of All Randomized Controlled Trials for inclusion in the Canadian CPGs

**New RCTs included in the 2009 update are italicized.**

1.0 Enteral Nutrition vs. Parenteral Nutrition

2. Early vs. Delayed Nutrient Intake

3.1 Use of indirect calorimetry vs. predictive equations

3.2 Achieving target dose of EN

4.1a Diets supplemented with arginine and select other nutrients

July 20th 2009

July 20th 2009

4.1b Composition of EN: Fish Oils

4.1c Composition of EN: Glutamine

July 20th 2009

4.1d Ornithine Ketoglutarate (OKG)

4.2a High fat/low CHO

4.2b Low fat/high CHO

4.2c High Protein vs. Low Protein

4.3 Protein/Peptides

July 20th 2009

4. Fibre

5.1 Feeding Protocols

5.2 Motility Agents

5.3 Small bowel vs. Gastric feedings

July 20th 2009

5.4 Body Position

6.1 Closed vs. Open system

6.2 Prebiotics/Probiotics/Synbiotics

6.3 Continuous vs. other methods

July 20th 2009
6.4 Gastrostomy vs nasogastric feeding

7.0 Enteral nutrition in combination with PN

8.0 Use of PN vs. standard care alone in patients with an intact GI tract

July 20th 2009

9.1 Branched Chain Amino Acids

9.2 Type of Lipids (PN)

LCT + MCT vs. LCT

July 20th 2009

**Fish Oil containing emulsions**

**Olive Oil containing emulsions**

**LCT vs. LCT**

July 20th 2009
9.3 Zinc

9.4 Composition of PN: Glutamine

July 20th 2009

10.1 Dose of Parenteral Nutrition

10.2 Use of Lipids

July 20th 2009
10.3 Mode of Lipid Delivery

10.4 Insulin Therapy

July 20th 2009

July 20th 2009

11.1 Combined vitamins and trace elements

11.2 Parenteral Selenium

July 20th 2009
