

International Nutrition Survey 2011

The
countdown
has begun!

The International Nutrition Survey 2011 is **LESS THAN FOUR MONTHS AWAY!**

Survey available in multiple languages!

The Instructions and Case Report Forms for the International Nutrition Survey 2011 will soon be available in six new languages, making it easier than ever for sites around the world to get involved:

简体中文 Français
Россию **Now Available!**

Español 日本
Português
Coming soon!

These translated case report forms can be found on the Survey's "Study Tools" page.

Barriers Questionnaire (Draft) Now Available!

This year, in addition to the nutrition practice audit, as part of the International Nutrition Survey 2011 we would like to offer all participants the opportunity to also conduct a barriers assessment. This assessment involves surveying ICU staff about important barriers to enterally feeding critically ill patients in your unit.

Want to see a draft version of the questionnaire? From www.criticalcarenutrition.com, click on "International Nutrition Survey", then on the left hand navigation menu, click on "Study Tools". You may download a Microsoft Word document containing the questionnaire.

In addition to the Microsoft Word version of the questionnaire, the final version of the questionnaire will also be available in an online format prior to the beginning of the International Nutrition Survey 2011.

The Barriers Questionnaire:

Why participate?

The results of this assessment complements your nutrition performance site report. It will enable you to select strategies designed to overcome identified barriers at your local site.

How to participate:

- Distribute questionnaire to nurses, physicians and dietitians in your ICU
- Use posters/reminder memos to help maximize number of responses

Remuneration:

- \$500 CAD towards attendance at a scientific meeting of your choice

ASPEN's Clinical Nutrition Week 2011 is upon us!

ASPEN's Clinical Nutrition Week starts tomorrow, January 29th, and runs until Tuesday February 1st, 2011. There are lots of great sessions being offered on topics related to Critical Care Nutrition.

If you are going to be at Clinical Nutrition Week, be sure to come and visit us and introduce yourselves! If you are thinking of participating in the survey, you may be interested in attending our **Focused Learning Session on "Participation in the International ICU Survey"**, which is taking place on **Monday 4:00-5:30PM**. We will discuss the background and rationale for the survey, and some of the research the survey has generated. We will also review the methodology of the survey and explain step-by-step how to get involved. See page 24 of the CNW Preliminary Program for more information!

We look forward to seeing you there!
