

Research Job Critical Care Nutrition

The Clinical Evaluation Research Unit is a hospital-based research unit in Kingston, Ontario. We have expertise in designing clinical trials, measuring health outcomes, and evaluating health care programs. We have an infrastructure capable of supporting multicenter clinical trials with adequate administrative, statistical, project management, and IT support. One of our major interests is in *critical care nutrition* and we are recruiting an individual to support ongoing research activities and be responsible for developing new research programs in the broad area of critical care nutrition. See www.criticalcarenutrition.com for a profile of our current activities.

You are a Dietitian with advanced research training (either Master's or PhD degree) or a health care provider with experience in a critical care or nutrition-related area with advanced research training (either Master's or PhD degree). You are interested in being part of a successful multidisciplinary critical care research group. You have a proven track record in scientific writing, as evidenced by your record of publications and grants awarded. Your responsibilities include conducting systematic reviews (ongoing), and writing research protocols, grants, and manuscripts. In addition, you may provide methodological consultations to other members in the Department of Medicine. You will be given adequate time and opportunity to develop an independent research program. Strong communication, interpersonal, and organizational skills are required. Salary commensurate with experience.

If you are interested in a 100% research job in a multidisciplinary research environment, please forward your resume, and names of three references to:

Daren Heyland
Director, Clinical Evaluation Research Unit
Angada 4, Kingston General Hospital
K7L 2V7
dkh2@post.queensu.ca
Fax: 613-548-1351

Only applicants selected for interviews will be contacted. This competition opens July 15, 2007 open until the position is filled.

"Queen's University has an employment equity program, welcomes diversity in the workplace and encourages applications from all qualified candidates including women, aboriginal peoples, people with disabilities and racial minorities."
