

### Definition of Acute Renal Failure for APACHE II

Say YES to Acute Renal Failure **if** within the first 24 hrs of admission to hospital:

- Creatinine  $> 124 \mu\text{mol/L}$  and  $\leq 177 \mu\text{mol/L}$  and subsequent creatinines show a steady increase  $> 177 \mu\text{mol/L}$

**OR**

- Creatinine  $> 177 \mu\text{mol/L}$  and
  - a) patient has documented pre-admission creatinine  $\leq 124 \mu\text{mol/L}$

**OR**

- b) creatinine decreases to  $< 124 \mu\text{mol/L}$  while patient is hospitalized.
